✉ [maheshbatta81@gmail.com](mailto:maheshbatta81@gmail.com) — ☎ +91 9381195890  
in LinkedIn — GitHub

## OBJECTIVE

---

To work in a challenging environment that allows me to utilize my skills, enhance my knowledge, and gain experience. I aim to make a meaningful impact while fostering self-development and professional growth.

## EDUCATION

---

**Bachelor of Technology - Geethanjali College of Engineering and Technology** 2023 - 2026  
Computer Science and Engineering (Data Science) **CGPA: 7.58**

## SKILLS

---

<b>Programming Languages:</b>	C/C++, Java, Python, JavaScript
<b>Web Development:</b>	MERN Stack (React.js, Node.js, Express.js, MongoDB)
<b>Data Structures &amp; Algorithms:</b>	Problem Solving on LeetCode and GeeksForGeeks
<b>Machine Learning &amp; Deep Learning:</b>	Numpy, Pandas, Matplotlib, Scikit-learn, TensorFlow, Keras

## INTERSHIPS

---

**Google AI/ML Virtual Internship** – Google AICTE (Remote)

Completed a hands-on internship covering core AI and machine learning concepts using Python. Built and evaluated basic ML models with popular libraries like TensorFlow and scikit-learn.

## COURSES

---

**Core Subjects:** Database Management Systems (DBMS), Operating Systems (OS), Computer Networks, Data Structures and Algorithms, Object-Oriented Programming (OOP)

## PROJECTS

---

### Memory Mania — Full Stack Web Application

**Technologies:** MERN Stack (MongoDB, Express.js, React.js, Node.js)

- Built a secure and user-friendly platform for managing notes and credentials with full CRUD functionality. Implemented JWT-based authentication to ensure data privacy and secure user access. Deployed the application on Render, enabling seamless online access.

[github.com/maheshbatta938/memorymania](https://github.com/maheshbatta938/memorymania)

### Stock Market Analysis System — Machine Learning Project

**Technologies:** Python, Pandas, scikit-learn, Matplotlib

- Developed a predictive system to analyze stock market trends using advanced machine learning algorithms. Performed extensive data preprocessing and feature engineering to improve model accuracy.

### Personal Portfolio Website

**Technologies:** HTML5, CSS3, JavaScript

- Designed and developed a fully responsive personal portfolio website to showcase projects, skills, and professional experiences. Applied modern UI/UX principles for smooth navigation and cross-device compatibility.

## CERTIFICATIONS

---

- Java Programming - Oracle
- Python Programming - Cisco
- MERN Stack Development - Pluto Academy
- SQL (Basic , Intermediate) - HackerRank
